Carreer Resume

Giga Net Informática LTDA

Acted as support at the Costumer Service, helping to resolve problems related to the network provided by the ISP on the client side, such as, fiber being but, slowness, internet not working, etc..., also worked in cash management, service order forwarding and on the phone.

Period employed 01/24/2020 to 08/15/2020.

W2ABrasil Desenvolvimento de Sistemas LTDA

Acted as a fullstack web developer working with a team developing e-commerce shops for retail sector companies. Technologies used for the development of such shops were WordPress, the WooCommerce plugin, jQuery, PHP and React for the development of Gutenberg blocks and MySQL as the database structure

I also worked in the development of the company's application for monitoring inventory and issuing electronic invoices based on the Oracle Apex framework using the Oracle Database in PL/SQL.

Period employed 10/26/2020 to 05/19/2021.

Minha Visita LTDA

Acted as a fullstack web developer working with a team developing the Minha Visita app, serving as a company management method for external teams to register activities done daily.

The technologies used in its development were the Quasar v1 JS framework created on top of the VueJS library using its version 2, MySQL database with PHP backend and later NodeJS using the NestJS framework.

Period employed 10/03/2021 to 01/23/2023.
